

Implementation / case study template

For deployment, quality-improvement and operational submissions where a clinical trial structure does not fit.

Title

- Name the setting and the intervention.

Context

- Organization, care setting, population served, baseline problem.

Intervention

- What was deployed, by whom, over what period, and how it was governed.

Measures

- Process, outcome and balancing measures, with data sources.

Findings

- Quantified change against baseline, plus qualitative feedback.

Lessons learned

- What you would repeat and what you would change.

Conflict of interest

- Declare funding and commercial relationships, or state 'None'.
